McCook, NE 69001

Dear Bill

Wow..did your letter reporting reception of KEZO on April 27th ever get shuffled around. After netting 3 postmarks, it arrived here and promptly got buried..till now. Really sorry!

Your report on KEZO programming facets on that morning was 100% correct.

KEZO broadcasts full-time, with 92,000 watts, at 92.3 mc.

Reports of fairly steady signal reception 90 to 100 miles from Omaha are not uncommon with us, but McCook is certainly not one of our "biggies."

Thank you for your inquiry and best wishes. Same to you!

Cordially,
Sandy Jackson
